## Program Assessment Report

February 13 – Present

---

### What is this?

This report provides an overview of the key metrics from the program assessment form responses found [here](#).

### How do I use this?

The report consists of data visualizations in the shape of scorecards, pie charts, time series and tables with heatmaps.

To refresh the data and include recent form submissions, click the "Refresh data" arrow at the top right of the page.

Use the arrows in the screen's upper left to navigate through pages and tables.

Hovering the mouse over the pie charts and time series will provide additional information about the category or point selected.

Heatmaps in tables are colored darker for larger values and lighter for smaller values.

## Summary

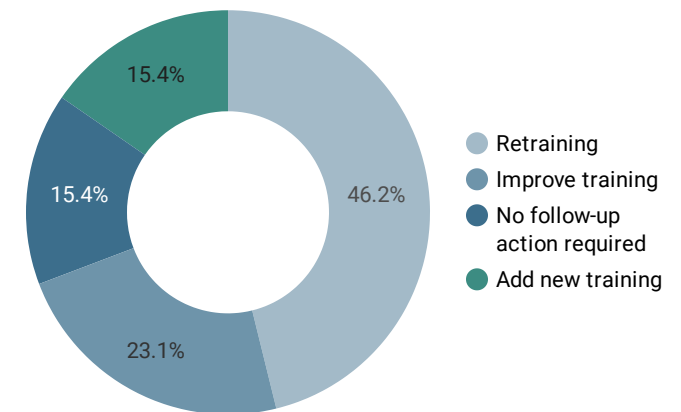

This table shows the follow-up actions suggested by every auditor for every family and if applicable, their comments related to retraining, adding or improving the training.

	Auditor	Community	Family	Follow-Up Action	Comment
...	Elda	Goyena	Hellen Espin...	Retraining	Jul 14, 2020
...	Elda	Troilo	Maria De Fat...	Improve training	Jul 13, 2020
...	Elda 10	Troilo	Karla Galeano	Retraining	Jul 14, 2020
...	Elda 11	Troilo	Melania Joc...	Add new training	Jul 14, 2020
...	Elda 11	Troilo	Luz Marina ...	No follow-up action required	Jul 14, 2020
...	Elda 2	Goyena	Yader Morales	Retraining	Jul 13, 2020
...	Elda 3	Troilo	Marvin Toval	Retraining	Jul 13, 2020

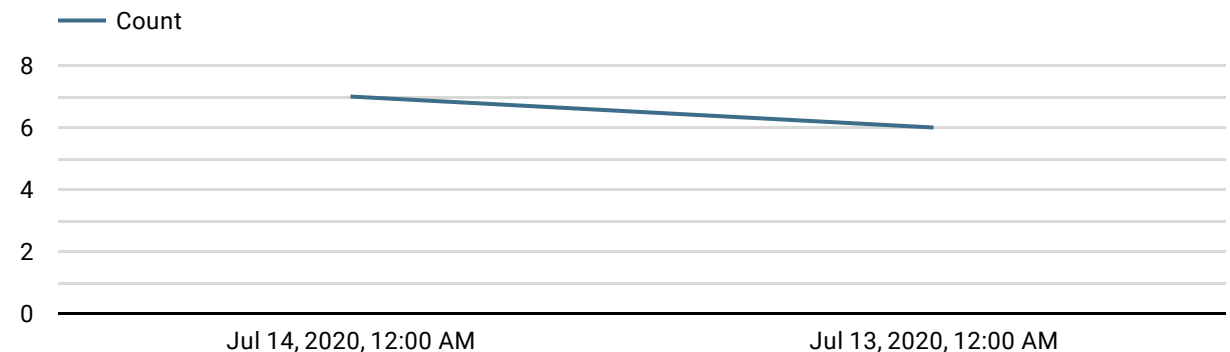

1 - 13 / 13

## Overall Training Performance

The chart to the right shows the distribution of follow-up actions as suggested by the auditors in the field. Across every program (HCT, Reforestation, Farming and Water & Sanitation), the majority of follow-up actions seem to be [Enter Largest Pie Value Here]. Due to this observation, [Enter Strategy Here] should be considered in future trainings.

## Total Responses Over Time

# HCT Program Outcomes

## Internalization of Training in 3 Months

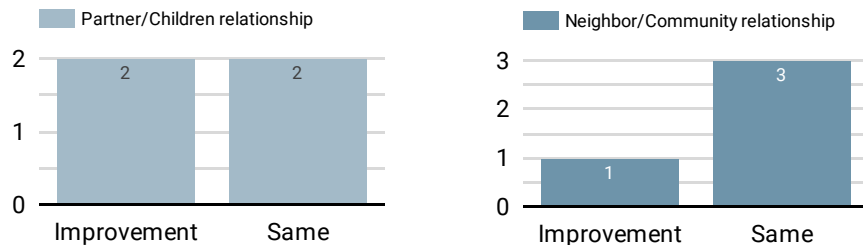

Select date range

Three of the internalization goals of the HCT program include: improved self-esteem, improved motivation and reduced levels of depression or anxiety. The distribution of the overall improvement in these categories is seen below. [Enter description of results below here.]

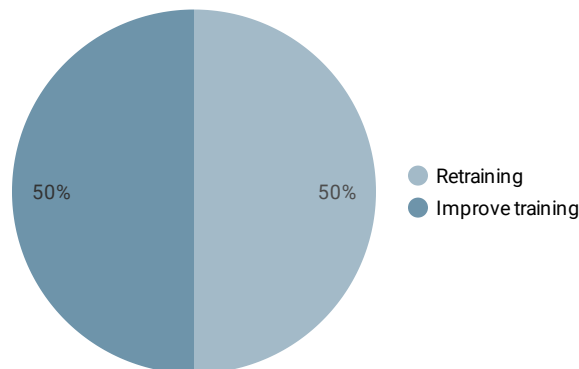

## Demonstration of Training in 3 Months

The remaining goals of the HCT program include the improvement of the beneficiary's relationship with their partners, children, neighbors and community. Below, you will find the assessment in these categories over the 3 month period. [Enter description of results below here.]

## Follow-Up Action

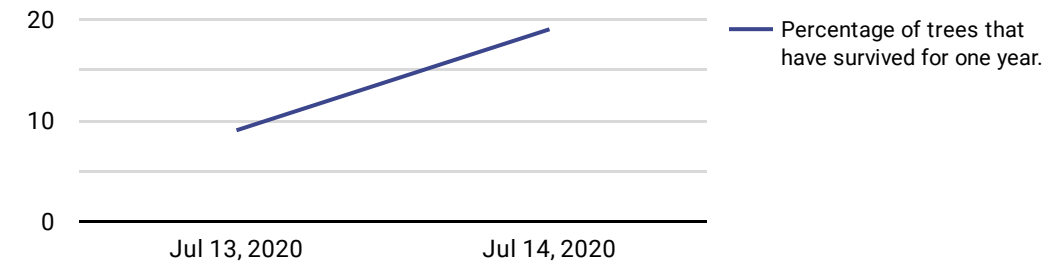

The chart to the right shows the distribution of follow-up actions as suggested by the auditors in the field. For the HCT program, the majority of follow-up actions seem to be [Enter Largest Pie Value Here]. Due to this observation, [Enter Strategy Here] should be considered in future trainings.

# Reforestation Program Outcomes

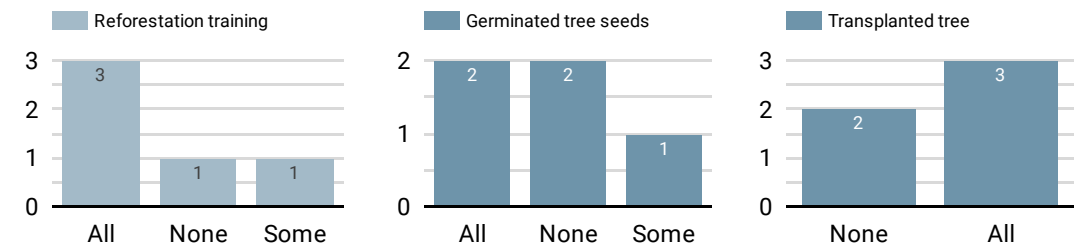

## Demonstration of Training in 3 Months

One goal that demonstrates the performance of the reforestation program is the percentage of trees that have survived for 12 months. The distribution of the overall improvement in this category is seen below. [Enter description of results below here.]

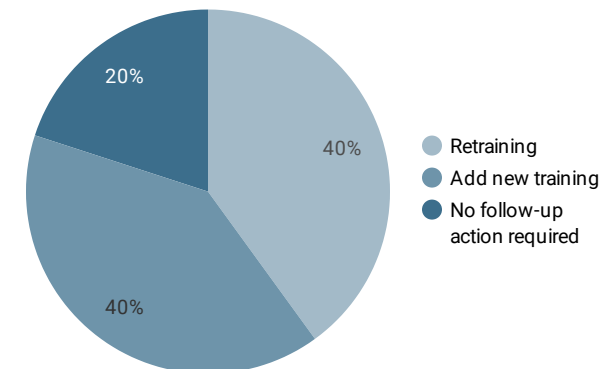

## Internalization of Training in 3 Months

The remaining goals of the reforestation program include how many families properly implemented the reforestation training, successfully germinated tree seeds and successfully transplanted trees. Below, you will find the assessment in these categories over the 3 month period. [Enter description of results below here.]

## Follow-Up Action

The chart to the right shows the distribution of follow-up actions as suggested by the auditors in the field. For the reforestation program, the majority of follow-up actions seem to be [Enter Largest Pie Value Here]. Due to this observation, [Enter Strategy Here] should be considered in future trainings.

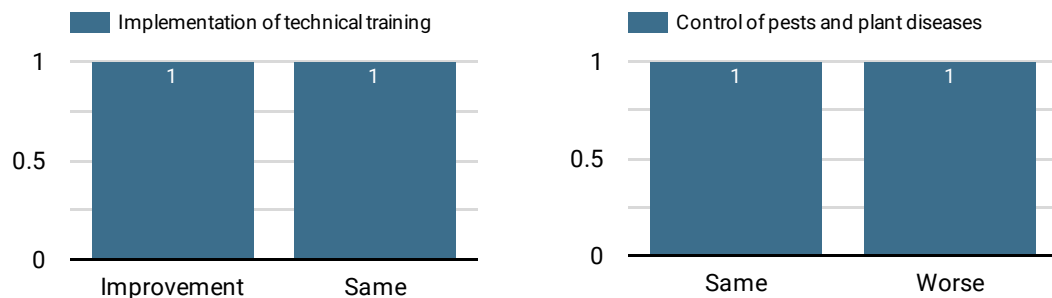

## Farming Program Outcomes

### Implementation of Training in 3 Months

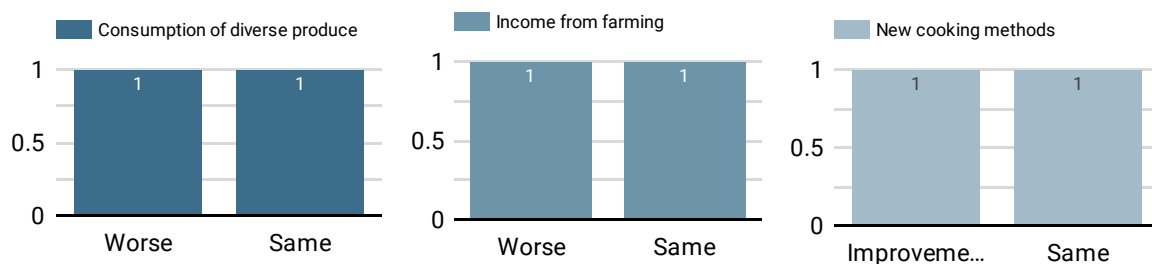

Select date range ▼

The internalization goals of the farming program are that the family properly implements the technical training and controls pests and plant diseases. The distribution of the number of beneficiaries that achieved these goals is seen below. [Enter description of results below here.]

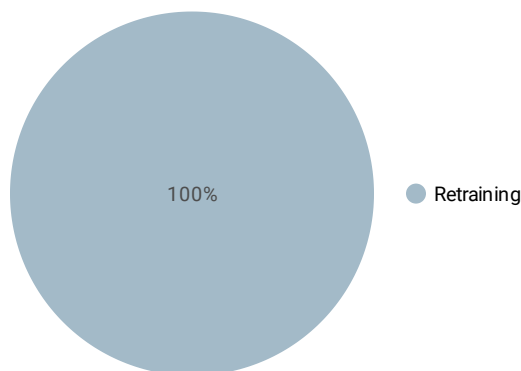

### Demonstration of Training in 3 Months

The remaining goals of the farming program include the consumption of diverse produce (fruit/vegetables), an increased income from farming, and the implementation of new cooking methods. Below, you will find the assessment in these categories over a 3 month period. [Enter description of results below here.]

### Follow-Up Action

The chart to the right shows the distribution of follow-up actions as suggested by the auditors in the field. For the farming program, the majority of follow-up actions seem to be [Enter Largest Pie Value Here]. Due to this observation, [Enter Strategy Here] should be considered in future trainings.

## Water & Sanitation Program Outcomes

### Implementation of Training in 3 Months

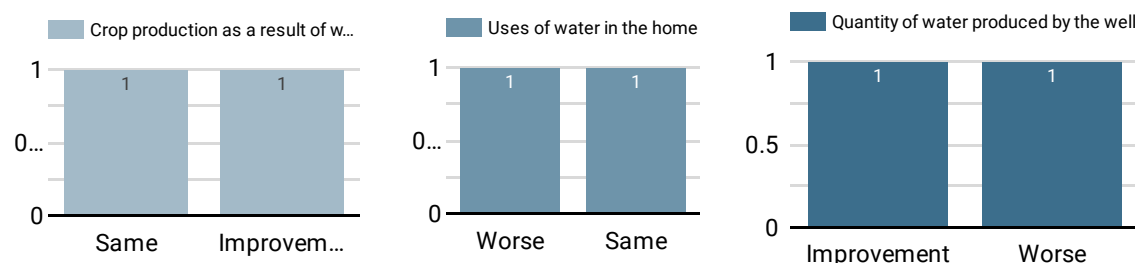

The goals of this program include the proper treatment and use of water, grey water and inorganic trash. This is listed below. [Enter description of results below here.]

Family	Water Uses	Greywater Treatment	Inorganic Trash
Maria De Fatima Castillo	null	null	null
Luz Marina Rivas	null	null	null

1 - 2 / 2 < >

### Demonstration of Training in 3 Months

The remaining goals of the water and sanitation program include the improvement of crop production as a result of well water, an improvement in the uses and quantity of water. Below, you will find the assessment in these categories over the 3 month period. [Enter description of results below here.]

### Follow-Up Action

The chart to the right shows the distribution of follow-up actions as suggested by the auditors in the field. For the water and sanitation program, the majority of follow-up actions seem to be [Enter Largest Pie Value Here]. Due to this observation, [Enter Strategy Here] should be considered in future trainings.
